Grants

BWSR grants provide funding to local units of government to deliver soil and water conservation services to their communities. Grant funds support and increase local capacity to implement programs and, provide cost-share with landowners who install conservation practices on their land to benefit state water and soil resources.

Biennial Budget Request

The Biennial Budget Request is a process to coordinate all grants that BWSR manages that protect, restore and enhance Minnesota's water and related land resources. This Initiative will result in increased efficiency in BWSR grant programs, provide information to support State budget processes, and encourage improved local government water quality project planning.

Long-Term Persistent Implementation in SE MN

....And BC /LGU Roles

“It was crucial for local boards to have flexibility in Cost-Share Rates”.

Ralph Tuck, RRSWCD

“Flexibility, rule waivers, put lot more stress and burden on staff. Implementing waivers allowed local priorities and policies but less consistency among the seven counties.”

Rick Grooters, Fillmore SWCD
